New York Polyclinic Medical School and Hospital

Chartered by the University of the State of New York. The oldest Post-Graduate School in America. Organized in 1881. Opened in 1882.

THE NEW YORK POLYCLINIC is a school for teaching graduates the most recent methods of diagnosis and treatment in every department of medicine. The clinical material is abundant and the Hospital wards adjoin the lecture rooms. Since the fire in 1896 a new building has been erected and thoroughly equipped, and the Institution is now prepared to offer better facilities than ever. Students may enter at any time.

ACETOZONE

A
New and
Effective
Remedy
in
Typhoid
Fever
and
Other Diseases
of
Bacterial Origin

A GERMICIDE OF MARVELOUS POWER.

ACETOZONE, the latest addition to the materia medica, is beyond question the most remarkable of germicides and intestinal antiseptics. Vastly more powerful than bichloride of mercury, in saturated aqueous solution it may be administered in therapeutic doses with perfect safety.

This new agent is a definite chemical compound—benzoyl acetyl peroxide. On contact with water it is decomposed into the extremely energetic germicides acetyl hydrogen peroxide and benzoyl hydrogen peroxide. A solution of these peroxides has the power of destroying all disease-germs.

Reports from eminent practitioners, based upon clinical experience, justify the belief that Acetozone is the most efficient remedy in typhoid fever ever placed in the hands of the physician.
